

INVESTMENT OBJECTIVE AND POLICY

Investment Objective

The Company invests primarily in UK securities with the long-term objective of achieving:

1. an increase of the Net Asset Value per share in excess of the growth in the FTSE All-Share Index; and
2. growth in dividends per share in excess of the rate of UK inflation.

Investment Policy

The Company will generally invest in companies quoted on a recognised stock exchange in the UK. The Company may also invest up to 20% of the market value of the Company's investment portfolio, measured at the time of any acquisition, in securities listed on stock exchanges outside the UK. The portfolio is selected by the Portfolio Manager on the basis of its assessment of the fundamental value available in individual securities. Whilst the Company's overall exposure to individual securities is monitored carefully by the Board, the portfolio is not primarily structured on the basis of industry weightings. No acquisition may be made which would result in a holding being greater than 10% of the market value of the Company's investment portfolio, nor will the Company invest more than 15% of the market value of its investment portfolio in any other UK-listed investment trusts or investment companies. Further, the Company may not hold more than 5% of the issued share capital (or voting shares) of any one company. Investment in convertibles is subject to normal security limits. Should these or any other limit be exceeded by subsequent market movement, each resulting position is specifically reviewed by the Board. The Company may borrow money to provide gearing to the equity portfolio of up to 25% of net assets.

Use of derivative instruments is monitored carefully by the Board and permitted within the following constraints: the writing of covered calls against securities which in aggregate amount to no more than 10% of the value of the portfolio and the investment in FTSE 100 futures which when exercised would equate to no more than 15% of the value of the portfolio. Other derivative instruments may be employed, subject to prior Board approval, provided that the cost (and potential liability) of exercise of all outstanding derivative positions at any time should not exceed 25% of the value of the portfolio at that time. The Company may hedge exposure to changes in foreign currency rates in respect of its overseas investments.
